Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because it contains numerous grammatical errors. Correction is required. See MPEP § 608.01(b).
2. The disclosure is objected to because of the following informalities: The disclosure contains numerous grammatical errors. Appropriate correction is required.

Claim Objections

3. Claims 1-3 are objected to because of the following informalities: They contain numerous grammatical errors. Appropriate correction is required.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by Guivarc'h.

In regard to claim 1, Guivarc'h discloses a piping connector comprising pipes 1, 2 and a connection body 3, and ejector for ejecting water, characterized in that the two ends of the connection body 3 are provided with a threaded face 7 for locking with an arch shaped threaded cap 15 passed through the pipes for connection, the rim face at the connection end of the pipe is provided with a positioning hole 29 for the insertion of a positioning rim 14 for engagement with the threaded cap 15, together with the mounting of a sealing rim 27 and a pad 31, the connection of the piping connector is secured.

Art Unit: 3679

In regard to claim 2, wherein the side face of the middle section 3 of the connection body is provided with through screw hole for locking with an ejector (protrusion on bottom center of 3 in fig. 2) so that the connection head is freely rotated and controlled.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Guivarc'h. Guivarc'h discloses a connector with one through hole, but not more than one. However, it would have been obvious to add more than one through hole because duplicating the components of a prior art device is a design consideration within the skill of the art. In re Harza, 274 F.2d 669, 124 USPQ 378 (CCPA 1960).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gorog et al., Lasko, Bard and Woodruff all disclose similar couplings common in the art.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Bochna whose telephone number is (703) 306-9040. The examiner can normally be reached on 8-5:30 Monday-Thursday and every other Friday.
